

Beyond every product,
person or brand is *a story*.
A story that deserves
attention.

EE LABELS

1 Hangtag ideas for *reuse*.

As suggested in our mailing we love ideas that prolongate the lifecycle of the products we make. Our ideas for hangtags are to reuse them as a *scented bag*, *bookmark* or *doorhanger*.

EE LABELS

2 Labels that improve *recycling*.

Be aware that as a brand you can play a significant role in the way your products are consumed by their buyers. Communication is key. Add the necessary care information to give the items the largest life possible. And don't forget to think about the next step. What is the best way to recycle your products? We suggest adding this information on *your brand label* or by including a *QR-code*. Unlike packaging or a hang-tag, this label stays with the product during the entire lifecycle.

EE LABELS

3

Reduce plastic.

Reduce plastic by choosing milkpaperbags. *100% plasticfree* and still *transparent*. The perfect first impression when customers receive your product. Customers will love the handling and appreciate your products even more. Design any print you like to make the packaging totally yours.
